The seal in png format has a transparent background.This transparent BG is shown as black in some PCs.It is actually a display problem.You can use the seal image.

To know more about this Black BG problem of png image filesÂ and to find a solution [click here](#) or you can search the google.

Note:- Company Icon Images needs to be 1024 pt x 1024 pt image with/without transparent background.
Lower resolution icons may give poor quality seal images.

Yin/Yang(for normal type seals only):
Yin seal - Transparent Background And Letters in Seal Colour;
Yang Seal - Background in Seal colour and Letters are transparent.

Note:- Avoid very Dark Colours for Emboss or Wax Seal types.
